Plot:

Shadow of War is the first card expansion for the best selling World of Warcraft: The Board Game. This expansion contains hundreds of new cards, both expanding the base game and introducing several innovative concepts. The new item deck rewards players with interesting trinkets and artifacts. A new quest deck puts a bounty on independent creatures, rewarding characters for defeating blue creatures. Each class deck also receives ten new powers and ten new talents, further developing the character's arsenal of abilities and creating a richer gaming experience. But the players are not the only ones with powerful new resources at their disposal. Each Overlord now has his own special cards that are shuffled into the event deck. If the players do not keep these minions in check, the Overlords can become even more dangerous!
